## The 15<sup>th</sup> Annual GeoElections User's Conference – November 2016

After a hectic year for elections officials across the country, concluding with a Presidential election like no other in the history of the United State, another outstanding GeoElections Conference was conducted for veterans and new users alike. With four guest speakers (listed below) and presentations by the people at ICW, the Conference presented a great opportunity for both professional networking and relevant content.

The topics discussed ranged from a review of the US Census Phase II Data Redistricting (VTD) Program to GeoElections running in the 64 bit version of MapInfo Professional, Version 16. Power Point presentations are available at [www.icwmaps.com](http://www.icwmaps.com).

GeoElections Users from two states and speakers from three states made the 15th a great conference!

**Ira Pyles**, ENP, 9-1-1 Emergency Operations Manager for the Hillsborough County, FL 9-1-1 Agency provided an overview of the roll his agency plays pertaining to street naming and addressing. At the same time Ira explained their roll coordinating municipalities and the US Postal Service to clarify the official street names and addresses elections staff can rely upon when constructing their street indexes for voter registration. Ira pointed out that while each county may place this responsibility with a different department, the results should be universally alike.

**Scott Miller**, GIS/Tabulation Specialist, Clay County, FL SOE provided a presentation and conducted an open debate of the recent House Bill 541 now FL Statute 2016.23. This statute requires the maintenance of secondary addresses that distinguish one place of residence from another.

**Colleen D. Joyce**, Assistant Chief, Census Redistricting & Voting Rights Data Office described numerous data exchange programs the Bureau conducts in partnership with the States in preparation for production of the P.L. 94-171 Data provided to the States for redistricting in 2021-22. In particular Colleen focused upon the Phase II VTD program and the Boundary Annexation Program. Colleen pointed to the recently published “Notice of determination.” discussed on the next page.

**Elliot Cox**, Product Manager for MapInfo Professional, Pitney Bowes, Inc., demonstrated the 64 bit version of MapInfo and discussed numerous enhancements PB has incorporated into Version 16. Elliot spoke of the PB commitment regards support for the current 32 bit version of MI Pro and plans to maintain Version 15 as a reliable product into the foreseeable future.
