If you need to update to the most current version simply follow the on screen instructions including calling for help.

ICW Releases GeoElections 6.0

GeoElections 6.0 includes features that extend its power and functionality, increasing efficiency and productivity of staff.

Version 6.0 includes more features than any prior release since the initial introduction of **GeoElections**. Following is a brief list:

GeoPackager facilitates the creation of menu driven custom map data for distribution on CDs and/or DVDs such as the precinct finder map to the right. It includes a free viewer, **ProViewer**. Great for use by schools, candidates, parties, elected officials and more. All of which can be run from the distribution media without the need for the user to install software on their machine.

Both **MapMaker** and **Build Street Map** include the creation of both native **Mapinfo** and/or **ESRI** map files at the user's choice.

The **DOJ** and **CUSTOM Equivalency** features streamline the process of full compliance to statutory standards when required.

Quality Control includes **Contiguity** and **Compactness** algorithms to assist in meeting statutory and judicial review.

Utilities includes **Get Voters** which works with your VR and **ImageMaker** which can create 100's of raster maps from a list.

Visit www.icwmaps.com for additional information.

GeoPackager

With **GeoPackager** you can distribute ready to use maps with an easy-to-use menu driven interface that will meet the needs of the most sophisticated to a first time GIS user.

Your clients can run **ProViewer** from the CD/DVD or copy the contents to a hard drive to run at the full speed of the machine. No software to install, just plug and play

The image displays a central menu interface for the Putnam County Board of Elections, titled "Putnam County Board of Elections". The menu includes the following options: Congressional, Senate, House, Townships, Schools, and Precinct Finder. To the right of the menu is a photograph of a building and the text "Published May 18, 2007" and "Use the HotLink Tool from the tool bar above to make selections from the menu to the left." Surrounding the central menu are several screenshots of the software's map interface, showing various geographic layers and boundaries. The maps include a scale bar indicating 0 to 10 miles. Arrows point from the menu options to the corresponding map layers.
